

ProximityG: A Python package for proximity and biological graphs in the plane

Héctor Maravillo^{*1}, Diego Villareal², and Heriberto Espino²

¹Universidad Autónoma de la Ciudad de México, Mexico

²Universidad de las Américas Puebla, México

Tags

Python; proximity graphs; biological graphs;

Summary

Empty region graphs [2]
 γ -neighborhood graph [17]
 α -shapes [6]
 β -skeletons [11]
Gabriel Graph [13]
Unit disk graph [3]
Empty Elliptic graph [4]
Elliptic gabriel graph [15]
RNG [16, 8]
Stepping Stone Graph [9, 10]
Sigma-local graph [1]

Statement of need

Applications: clustering and manifold learning [20]
Machine learning [19]
Asymptotic analysis of proximity graphs [5]
Probabilistic properties of the k -nearest-neighbors graph [7]
Street network characterization [18, 14, 12]

^{*}Corresponding author.

Package overview

Usage example
